CNC Operator

Description

Ameriscan Designs is an American-based millwork construction company that specializes in providing architectural millwork, custom cabinetry, plastic laminates, complex solid surface fabrication, architectural doors and frames as well as metals, glass, stone and upholstery. With more than 30 years in the business, Ameriscan has earned its reputation as one of the nation's top suppliers of high-quality custom commercial and hospitality millwork and furniture. The company has been experiencing steady sales growth due to superior quality & world-class customer service. Our manufacturing philosophy is to build everything on site, so that we may control quality and offer the shortest lead-time in the industry. We are hiring a CNC Machine Operator for the 6:00AM – 2:30PM shift.

Responsibilities

Core duties and responsibilities for the CNC Operator include the following:

- Load and execute CNC programs to cut particle board, MDF, plywood, and solid surface materials according to project specifications.
- Set up and operate CNC machines, ensuring accurate and efficient production of millwork components.
- Read and interpret shop drawings and architectural blueprints to verify cut dimensions.
- Inspect finished components for quality and accuracy, making adjustments as necessary to maintain Ameriscan Designs' standards of excellence.
- Perform routine maintenance on CNC machines, including cleaning and lubricating equipment.
- Collaborate with team members to ensure smooth workflow and timely completion of projects.
- Adhere to all safety protocols and maintain a clean and organized work environment.
- Handle materials safely and efficiently, including loading and unloading materials from CNC machines.
- Identify and troubleshoot any issues that may arise during the CNC machining process.
- Continuously seek opportunities to improve CNC programming and machining techniques.
- Cross train throughout departments as needed.
- Other duties as assigned

Qualifications

- High school diploma or GED required; additional technical training or certification preferred.
- Minimum of 3 years of experience as a CNC Operator in a manufacturing environment.
- Proficiency in reading and interpreting shop drawings and architectural blueprints.
- Strong understanding of CNC programming and machine operation.
- Experience working with particle board, MDF, plywood, and solid surface
